PROFESSIONAL EXPERIENCE

Game Programmer Intern | Feb 2025–Apr 2025

Double Eleven Ltd. – Kuala Lumpur, Malaysia

- Contributed to **Rust: Console Edition**.
- Implemented and bug fixed gameplay features across multiple systems.
- Diagnosed and fixed rendering issues using Razor (PlayStation) and PIX (Xbox) tools.
- Network server/client optimization.
- Designed, optimized, and implemented HLSL shaders within Unity's High Definition Render Pipeline (HDRP)
- Collaborated in daily stand-ups, code review, ensuring code quality, consistency, and maintainability

AR Unity Developer | Oct 2023–May 2024

Torum Technology Sd. Bhd. – Kuala Lumpur, Malaysia

- Developed and launched a workflow to automate app development, creating a prototype AR face tracking application
- Implemented Asset Bundles and integrated CDN (S3) for efficient asset management, and integrated AWS SDK to streamline asset syncing between Unity and the CDN
- Developed AR applications for Android and iOS, including iOS native integration.
- Created Python automation plugins for Blender to compose 3D NFTs, and then exported to Unity Engine

Unity Developer | Dec 2023–Mar 2024

The Wider Collective – Remote

- Led the Unity development team, collaborating closely with artists and designers to create a complete endless runner game from concept to final release.
- Implemented deep linking, enabling seamless transitions from the client's app directly into the Unity game.
- Integrated an API connecting to the client's server, providing real-time feedback on user playtime and engagement.
- Integrated the Firebase SDK to facilitate Google Play Services leaderboard functionality, enhancing competitive gameplay and user engagement

Audio Programmer | Dec 2022–May 2023

Good Place Games Öu – Remote

- Developed and implemented sound effects in Unity using C# scripts, ensuring audio responded dynamically to gameplay events and player actions
- Composed and produced original music and soundscapes for trailers and in-game teaser content, tailored to narrative and atmosphere
- Integrated audio systems (event triggers, parameter-driven sound variations, and spatial audio) directly into core gameplay mechanics to enhance player immersion

EDUCATION

University Of Wollongong Malaysia | 2022–2024

Bachelors of Game Development (HONS)
